AUSTRALIA'S NATIVE FLORA

Diversity · Records · Threats · Protection

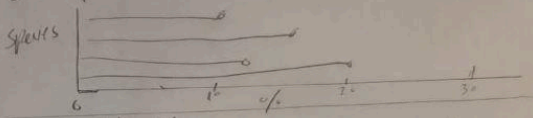

Short intro explaining species, families, regions, and limits...

1. A DIVERSE FLORA

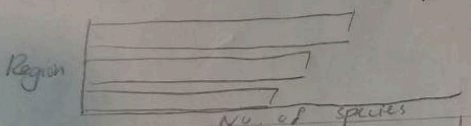

Treemap of Plant Families

Dot plot - shared of listed species

Ranked bar chart - total species

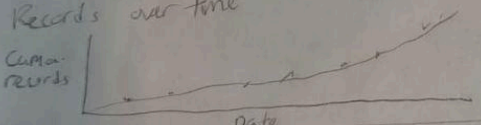

Choropleth Map

2. What the records reveal

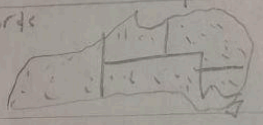

Records over time

What does this tell us?

More records ≠ more plants...

Point map - occurance records

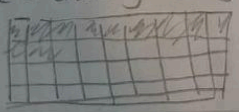

Species A

Each dot represents a recorded occurance.

3. Diversity under Pressure

Waffle - critically endangered species

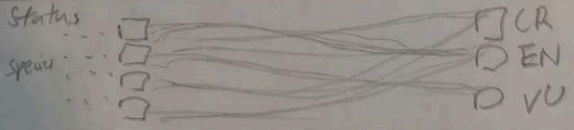

share: 27%

1 square: 1%

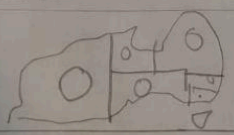

Critically Endangered (CR) vs. other threats

CR species face an extremely high risk

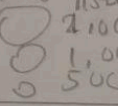

Family → Threat Status

Proportional Symbol Map

Num. of listed species

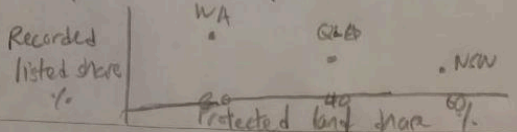

4. Putting protection in context

Histogram - protected land share

Comparison scatterplot
